The "SH" variables are specific to that survey. Even if the same questions were asked in 2008, the variable names will most likely not be the same. For country specific questions, the variables are generally named and coded in the same way as they were on the questionnaire. The variable will have a leading "SH" if the question was asked at the household level, a leading "S" if asked at the women's level, and a leading "SM" if asked at the men's level.

Please reference the questionnaires for the 2008 survey to see if these questions were asked.
