Hi!

I am new to this dataset. I tried to replicate Table 8.3 (Antenatal Care) from NFHS-5, India. I have kept data for midx_1==1. I have recoded the birth order (bord_01) as (1=1) (2/3=2) (4/5=3) (6/max=4). I tried to tabulate birth order with antenatal_care: doctor (m2a_1) for the recent live births. The result however didn't match with report.

It is my request to you to help in in this regard.

Thank you.

Regards

Rupon
