Thank you for your response. I'd like to clarify that I'm not looking to examine individual castes; instead, I aim to categorize castes into broader groups: SC, ST, OBC, and Other or General. All NFHS datasets, except for NFHS-1, include this caste categorization. However, since I'm pooling the data from NFHS-1 to NFHS-5, I need to establish similar categorizations in NFHS-1 as well. Could you please confirm whether it's possible to categorize castes in NFHS-1 into the four categories I mentioned?
