Following is a response from DHS staff member, Tom Pullum:

I believe the variables you are looking for are v707 in the first survey and v740 in the second one. These are in the IR files. The MR files, for men, include mv707 and mv740. I found them by entering "lookfor land" (in Stata). This command shows any variables that have "land" in the variable label. Such variables might also appear in the household survey (the HR and PR files) but I checked and they are not there. They are only in the IR and MR files.
