I have successfully accessed the country-level data for the Philippines, specifically the Admin 1 level, pertaining to individuals who have received all 8 basic vaccinations. The data was obtained from the Spatial Data Repository of the DHS Program, referencing the 2022 and 2017 DHS surveys.

Given our project requirements, we are keen to request subnational data at the ADM2, ADM3, and ADM4 levels, if available (.shp or .csv format). The specific indicator of interest is "Received all 8 basic vaccinations (CH_VACC_C_BAS)."

Could you please guide us on the necessary steps to proceed with this subnational data request? Your assistance in this matter is greatly appreciated.
