Following is a response from Senior DHS staff member, Tom Pullum:

In this survey, age in months is given by b19. In all surveys that include b19, users should use it instead of hw1, which was calculated as v008-b3. I believe the discrepancy may be due to this rather than to the construction of the code for EBF, which has not changed. Also, as in the GitHub code, you need to restrict to children living with the mother (b9=0). Please try again and let us know if you still do not get a match.
