Following is a response from Senior DHS staff member, Tom Pullum:

From your very brief statement, I cannot tell what the problem is. v502=1 identifies women who are currently in a union. Most (not all) of the DV questions relate to the current partner. If you want to include more women, just drop the condition. You will then add in women who were previously in a union (v502=2). Women who were never in a union (v502=0) are NA (or mostly NA) for the module.
