Our results differ from the Nepal DHS 2022 - Final Report when selecting the total sample of women with a live birth in the 2 years preceding the survey. We used MIDX=1 and B19\_01<24 to obtain the number of women with a live birth in the 2 years, resulting in 2007. However, the number of women from the Nepal DHS 2022 - Final Report was 1949 in Table 9.1 (Number of antenatal care visits and timing of first visit) and 1996 in Table 9.9 (Place of delivery).
