I created the year and month of interview variables using the following codes:

```
gen year_of_interview = int(( hv008 - 1 )/12) + 1900  
gen month_of_interview = hv008 - (( year_of_interview - 1900) * 12)
```

Should be use the variable 'date of interview (CMC)' when month and year of interview variables are already given?
