And in lieu of the DHS rates program being fixed in a timely manner, would someone be able to guide me through calculating SE's for the TFR?

I have successfully calculated the ASFRs and SE's at the regional level in R using the following template:

https://github.com/DHSProgram/DHS-Indicators-R/blob/main/Chapter05_FE/FE_TFR.R

I'm unsure, however, how to go from the SE's of the ASFRs to the SE of the TFR. (I have correctly calculated the point estimate for the TFRs at the regional level).

Thanks in advance!
