Subject: Merging BR to PR in NFHS-1 and NFHS-2

Hello,

I am attempting to merge the BR, as well as KR, file onto the PR file for NFHS-1 and NFHS-2. For later rounds, I was able to use the line number of the child in the household to achieve this. However, it seems like the data for NFHS-1 and NFHS-2 does not include the line number of the child as a variable in the KR and BR files. Is it possible to do this merge? If so, could you please point me towards the variables I could use for this merge?

Thank you,
Aryan Srivastava
