Following is a response from Senior DHS staff member, Tom Pullum:

You are welcome!

Here is the citation for that 1980 Illustrative Analysis:

Pullum, T. W. 1980. An illustrative analysis of fertility preferences in Sri Lanka. Scientific Report Series, No. 9, World Fertility Survey (International Statistical Institute).

The 1981 paper is different, but there is probably some overlap. I'd be surprised if you can find it. I may not even have a copy:

Pullum, T. W. 1981. Adjusting stated fertility preferences for the effect of actual family size, with application to World Fertility Survey data. In G. Hendershot and P. Placek (eds.), Predicting Fertility: Demographic Studies of Birth Expectations. Lexington, Mass.: Lexington books, Inc. (D.C. Heath and Co.), pp. 129-149.

Thanks for your interest!
