Hi,

I am trying to reproduce results in Table 7.13 Future use of contraception using the following syntax

```
use "KEIR71FL.dta", clear
gen fp_future_use = v362
replace fp_future_use=5 if fp_future_use==9
replace fp_future_use = . if (v502!=1 | v312!=0)
label values fp_future_use V362
ta fp_future_use [iw=v005]
```

The challenge is how the Missing category was created. Any help will be appreciated.

Thanks in advance!
