Subject: Nepal SPA 2021 Posted by rkchettri on Sun, 25 Feb 2024 04:40:51 GMT View Forum Message <> Reply to Message

Dear DHS experts,

We are analyzing Nepal SPA 2021 to know if services users paying for basic health services. We tried using recoded file, and also tried mering client observation/interview and facility file. But we were not able to generate same total number in the table 3.40 (for example ANC users who pay for services - 1250). We dropped private health facilities as we are interested in services users who pay in public facilities. Could you please suggest how to fix this problem?

The DHS Program User Forum

Thank you so much,

With kind regards, RK
