Thank you so much, Bridgette.

Your response is very helpful.

Yet, the table below shows the number of livebirths.

How can I get the number of the last child born before/after August 2019 among the classified pregnant women by region?

Could you also confirm the collected data (5,016 women interviewed) in 2021 were only from Nouakchott as the DHS report says?

Kind regards,

Kazumi
