---

In the Senegal IR datasets, I have noticed that variables capturing insurance coverage (v481, v481a, etc.) are unpopulated for several years (e.g., 2013-2015, 2017-2019). However, they are referenced in official DHS reports for these years and are populated in the datasets for other years (e.g., 2010/2011, 2016). This discrepancy suggests a potential issue with the dataset generation, unless if I'm missing something. I have checked the other files (BR, HR, etc.), and this information is also not included there. Could someone help?

Thank you in advance!
