Subject: Re: BMI indicator in KR File Posted by Janet-DHS on Fri, 10 May 2024 19:28:54 GMT View Forum Message <> Reply to Message

Following is a response from DHS staff member, Tom Pullum:

The KR file has one record for each child. The cmc of birth is b3. No subscript (such as _01) is needed; the index for the child is bidx. The age of the mother at the time of the birth is given in years by int((b3-v011)/12), The BMI of the mother in both the IR and KR files is v445.
