Thank you for the clarification. I have one more question: why does the number of observations for m13_1 not match the number of observations in the NR file? I expected m13_1 in the IR file to have the same number of observations as m13 in the NR file. The NR file for the Tanzania 2022 DHS has 5,318 observations for m13, while the IR file has 5,214 observations for m13_1. Could you please explain this discrepancy? Thank you.
