Following is a response from DHS staff member, Tom Pullum:

In the MR file for this survey, there is another variable that is an exact duplicate of mv763, namely mv853:. correlate mv763 mv853
(obs=432)

```
      |  mv763  mv853  
-----+-----
```

```
mv763 | 1.0000
```

```
mv853 | 1.0000 1.0000
```

I don't know why both of them are included. The two variables have different labels but they are clearly the same.

In the IR file, you are right that v763 is missing, BUT v853 is in the data. So v853 is what you are looking for.

These variables are used in the construction of tables 11.1.1 and 11.1.2.
