Following is a response from Senior DHS Staff Member, Tom Pullum:

DHS has a relatively recent tool that you can use to answer this kind of question. Go to the website [www.dhsprogram.com](http://www.dhsprogram.com), click on "Methodology" and then click on "Survey questions database". You can then enter a keyword such as "registered" or "registration", etc., and you will get a very helpful list of the questions and surveys that have included questions with that keyword.

I believe that few surveys have asked about the civil registration of all persons, rather than just children, but with this tool you can find what you want.
