Subject: Certain variables/questions not found on the questionnaire

Hi,

I am looking for the actual question for 'treated with respect at the facility' in the Kenya (IR) 2022 survey. I can see the variable in the dataset, but cannot find the question on the final reports/questions.

I noticed that the variable names starting with 's' are not on the questionnaire. Please let me know if there is any other report/document I should search for to find those questions.

Kind regards
Ghose
