Hello!

I am a bit confused about how the states (variable SState) were coded for the 2003, 2008 and 2013 Nigerian data series for the Northern Nigerian States in the women's file.

- 1. From my understanding there are 20 Northern Nigerian States, and Rivers is not one of them.
- 2. For 2003 they are coded by State name, but for 2008 and 2013 some are coded by name, but mainly they are coded by number-
- a. How to I know which state each number corresponds to? Thank you!
