Subject: Surveying same HH in BD DHS Posted by Thasin on Mon, 22 Jul 2024 03:14:12 GMT

DHS collects information for all children under 5 years. However, Bangladesh DHS waves are conducted every three years. Since clusters are not same in every wave, is it possible to resurvey same HH? If I want to work with all waves, should I only consider children under 3 years of age to rule out the possibility of over-estimation? Please suggest! Thanks!
