Following is a response from DHS staff member, Tom Pullum:
Sometimes there are very minor survey-specific modifications to the nutrition tables that can be hard to locate. I don't share this often, but here is the CSPro program for table 11.8 in the MZ 2022-23 survey: (see atachment). It is a text file that can be read with Notepad. I hope you can figure out the syntax and the variable names, just sufficiently to uncover whatever may be different from what you have been doing. Please let us know if you are able to do this or if you have other questions.
