Hello,

you can find the BMI variables if you search "body mass index" in the variable manager.

As for merging characteristics from the IR file onto the PR file, I would recommend searching the user forum for resources. Here, for example, is another thread that has lots of details about this merge: <https://userforum.dhsprogram.com/index.php?t=msg&th=12490&start=0>

Best of luck!

Sara
