Hi Janet,

Thank you for replying.
I am using NP_2022_DHS dataset. I need your help combining NPAI82DT with NPPR82DT and
NPIR82DT NPMR82DT. I combined AI with PR files.But found some missing data for self-harm.In
AI files the varibale hai4 gives 86 self-harm cases. But combining with PR files it is reduced to 72.
I don't know why.
Can you give the right code of combining AI files with PR< IR and MR dataset please.
I am using STATA and R for merging.

I want the data related to table 18.6

I also want to link the self-harm data to one question (Thoughts that you would be better off dead
or of
hurting yourself in some way of PHQ-9.
