Dear DHS program manager,

Good morning,

Thank you for your email a few months ago.

I am still struggling with this and do not have a solution yet. I am working with the Nigeria Demographic Health Survey (NDHS)

Please I need your guidance on what to do with the SPSS code in the GitHub program for adult and maternal mortality so that I am sure I am doing the correct thing. I do not understand how to go about using the code to generate one MM9 variable.

I ran an analysis but it returned 40,709 missing values. That was a red flag for me. Please kindly provide some guidance.

Thank you
kind regards

Kanayo Omonuju
