Following is a response from DHS staff member, Tom Pullum:

You can do this merge with the following Stata lines
* Merge IR and NR files in Nepal survey

use "...NPIR82FL.DTA", clear
*keep the variables you need from the IR file
keep v*

quietly merge 1:m v001 v002 v003 using "...\NPNR82FL.DTA"

tab _merge

* _merge=1: women who did not have a pregnancy in the past 3 years
* _merge=3: pregnancies in the past 3 years

keep if _merge==3
drop _merge

* Save this file with another name
