Good evening,

I am currently interested in doing a research work that would require the use of a GPS dataset from this document published in the DHS website, named "Sao Tome and Principe: MICS, 2014", but in the description of the GPS dataset its described as "Not distributed". Could please someone help me understand what this statement means and, if there is GPS datasets, is there anything I can do to have access to it?

I thank you in advance,
Kind Regards,
