Following is a response from DHS staff member, Tom Pullum:

You are probably looking at this page: [https://](https://www.dhsprogram.com/methodology/survey/survey-display-470.cfm)

www.dhsprogram.com/methodology/survey/survey-display-470.cfm. "Not distributed" probably means that no GPS file was even prepared. This is a very small country with a small population. Perhaps there was no way to mask the identity of the clusters with the usual displacement procedures. Whatever the reason, no GPS dataset is available.
