Hello,

I have managed to follow your guidance and visited the suggested areas to check indicators which can help me. I am still having problems to locate the appropriate data for my study population. I even checked STATcompiler and the provided links in previous response but I did not manage to find indicators in relation to vulnerable population rather found general ones. So, I still need your guidance on where I can get indicators for vulnerable population such as Gay (MSM), Female Sex Workers (FSW), drug addicts, prisoners, adolescent girls and young women (AGYW) among others.
