---

Cenforce 200 mg is a high-dose medication used to treat Erectile Dysfunction (impotence) in men. It contains 200 mg of Sildenafil Citrate, which works by increasing blood flow to the penis, allowing men to achieve and maintain an erection during sexual activity.

While Cenforce 200 is effective for many men, its safety depends on individual health conditions and proper usage. Because it is a stronger dose, it is generally recommended for men who do not respond well to lower doses like Cenforce 50 or 100 mg. However, it must be used under strict medical supervision to ensure safety.
