Dear DHS users,

In your file CI+Regions for 1998-1999 Côte d'Ivoire DHS, the shdept (56) is the Jacquelineville department located in the south region (except Abidjan). However, in the geographic database, the DHSCLUST (99) is in the shdept (56). This cluster is in the West region according to its geographic coordinates and not in the South. Where is it exactly the cluster 99 or the shdept 56?

Second, I would like to ask how to compute mortality rates among children under five years old using the 1998-1999 and the 2011-2012 Côte d'Ivoire DHS data.

Thanks.

Emmanuel Barankanira  
France.
