Subject: Re: Education: inconsistency b/w HV and HA variables Posted by Liz-DHS on Thu, 15 Jan 2015 19:49:10 GMT View Forum Message <> Reply to Message

Dear User,

Here is an answer from one of our experts, Ladys Ortiz:

Quote: The level of education is asked of all the members listed in the household age 5+ (the cutoff age can vary per country); and also is asked of each eligible individual that accepts to be interviewed. HA66 and HV67 is coming from these two sources:

a) if the woman was interviewed the education is coming from her individual interview (V106)

b) if the woman was not interview the information is coming from the household listing (HV106).

Thank you for your post.
