Dear User,

At this time we do not have STATA files to calculate Maternal Mortality for distribution. Please refer to The Guide to DHS Statistics <http://dhsprogram.com/publications/publication-dhsg1-dhs-questionnaires-and-manuals.cfm> for a better understanding of many of our statistics. The section on ADULT AND MATERNAL MORTALITY begins on page 153 of the guide and is under the ADULT AND MATERNAL MORTALITY bookmark. This guide will

Quote:provide an overview on key aspects of the organization and use of DHS data sets.

It will also

Quote:serve as a reference document for researchers on the definitions and calculation of complex statistics used in DHS reports

All our tables for our final reports use CSPRO. However, you can find useful STATA tutorials at [http://www.cpc.unc.edu/research/tools/data\\_analysis/statatutorial](http://www.cpc.unc.edu/research/tools/data_analysis/statatutorial)
