pls i urgently need a result of the already written CSpro-do file analyzed results on High-risk fertility behaviour since that is the only available codes for now. pls use Nigeria DHS 2013 data set. pls indicate either it is the NGIR6FL or NGKR6FL or NGBR6FL or either you are merging any of the data files together.

Alternatively, any one who has the STATA codes for high-risk fertility behaviour categories can also help forward it to me.

thank you.
