Hello,

I am a first time user of the measure DHS datasets working with the Nigeria DHS 2013. I watched the videos on how to download and open the data sets in STATA. I downloaded the folders, unzipped them, and clicked extract all - but the files inside are not being recognized and Windows is asking what program I want to use to open them.

I was logged in when I did the download, and I have STATA version 13.1 on my computer.

I would appreciate any advice on what to do to get these files to open smoothly.

Thank you!
