Subject: Individual Health Insurance Data - Rwanda

I am trying to find Health Insurance data either in the children's recode for 2000,2005 and 2010 in Rwanda, or the individual recode so that it can be merged with the children's recode, however the data seems to be missing?

Can anyone advice why the data is missing (the report suggests it was collected individually)? Or where I can find the data so that it can easily be merged, or how to merge the data from the household recode using SPSS please?
