Subject: Re: With merged datasets, which weight to use? Posted by Bridgette-DHS on Thu, 30 Apr 2015 14:24:14 GMT View Forum Message <> Reply to Message

The weight you use actually depends on the unit of analysis:

If unit of analysis is Household, use HV005/1,000,000 if Household members use hv005 if Women or children use v005 if Men use mv005 if Domestic Violence use d005 if HIV test results use hiv05
