Hello all,

I was recently authorised to access DHS dataset for Uganda but when I try to download, all the files are inactive, implying that I can not download them. This is where I was downloading from and I want DHS for Uganda from 1988 to 2011.

https://www.measuredhs.com/data/dataset/Uganda_Standard-DHS_2011.cfm?flag=1

Can anyone advise me whether I am missing some step in the download process? Thanks

Kasim
