Dear User,

I used Notepad (a text editor which comes with Windows Operating Systems) Clicked on File then Open. Notepad is looking for files with txt extension, but if you put *.* in the command line, it will list files with other extensions. I opened the file called MDIR51.FRW. I clicked on the file I was looking for. Then I clicked on Find (to get there click on Edit, then Find) and searched for V130. If you are working with SAS, you are most likely using MDIR52SD.zip. Best to unzip the files and if you want to look at the frequencies, you can use the method I just outlined above. I just now looked at V130 using MDIR51FL.FRW

Item V130: Religion

... tbd-name: '.RECODE5.REC11.V130'

Categories	Frequency	CumFreq	%	Cum %
1 Catholic	6198	6198	35.7	35.7
2 Protestant	6191	12389	35.6	71.3
3 Muslim	123	12511	0.7	72.0
4 Traditional religion	407	12918	2.3	74.4
5 No religion	3463	16381	19.9	94.3
96 Other	992	17373	5.7	100.0
Missing	2	17375	0.0	100.0
TOTAL	17375	17375	100.0	100.0
