Subject: Calculating Period Parity Progression Ratio Posted by gbemtrol on Wed, 19 Aug 2015 10:17:22 GMT View Forum Message <> Reply to Message

Hello everyone,

I'm having issues sorting out the data required for calculating Period PPR using synthetic parity cohort method.

I've been able to work out the year each woman had a specific birth order and the number of women involved.

I'm working with the Nigeria DHS 2013.
