Dear DHS experts,

I would like to calculate comparative wealth index of Bangladesh for all the six standard DHS surveys namely, BDHS 1993-94, 1996-97, 1999-00, 2004, 2007, and 2011. Is it possible to share the STATA or SPSS syntax for constructing Comparative Wealth Index (i.e. Constant (Alpha) and Coefficient (Beta))?

If it is not possible to share the code, can you share the Constant (Alpha) and Coefficient (Beta) of the CWI equation for the respective surveys?

Thank you.

Moin
