Hello DHS,

I'm currently trying to look at differences in feeding practices of children within the same family. For the "Foods given to the child in the last 24 hours" V414 questions, can answers to these questions vary between different children of the same mother? Or is this a question asked of the mother more generally for all of her children? Looking through the birth recode file, it seems like every child of a particular mother has the same response. I ideally wanted to see, within the same family, the difference in the foods a 3 year old eats compared to that of an infant.

Thanks for your help!
