Dear DHS Specialist,

I have merged IR (Women's) file with the KR (Kids') file using the following command. merge 1:m v001 v002 v003 using KR. It merges properly, however, i am unable to get Unique Identifier for every child. There is a repetition of child number in the merged file. How can i get the Unique Identifier. I am working on Pakistan's DHS 2006-07 and 2012-13.

Regards and Thanks,
Faiz
