Subject: Metadata retrieval from PDFs and citations for DHS core documentation - Zotero citations

Two additional queries re: the wonderful DHS citations library:

1. It seems like the metadata for citations is not attached to the PDF publications downloaded from the dhsprogram website. For users who have already downloaded PDFs, the fastest way to enable citations is to scan the PDF for embedded metadata via Google Scholar, as explained on Zotero's site.

I'm finding that the metadata doesn't seem to be embedded in the PDFs I've downloaded previously, as shown in this example.

I tried re-downloading a new version of the PDF and got the same result. Is there a way to find the metadata associated with a previously downloaded PDF?

2. A request for the future: In addition to citations for the Final Reports (which I've heard are coming), it would be very useful to have citation data for core DHS documentation, like the Guide to Statistics, Interviewer's Manual, and Core Questionnaires.

Thanks!
