Dear User,

V419 is the number of entries in the height and weight table. If you see a value such as 1, 2, 3, 4, these are the number of entries in that section. For example, if you see 4 in the data, this means there are 4 entries in this section and you should have data for 4 individuals. If you have additional questions, please feel free to post again. Thank you!
