Dear Liz,

I'm using STATA to calculate for the number of youngest child under two years living with their mother. I used the KR file (children dataset) with variables codes MIDX, B9 and hw1; using the Keep if command in STATA. However, I'm not getting the figures in the report. Please, what am I doing wrong? I'm trying to replicate Table 11.3: Breastfeeding status by age of Ghana DHS 2014
