I'm also not getting figures in the report. Believe I'm doing something wrong. I'm trying to replicate Table 11.3:Breastfeeding status by age using Ghana DHS 2014 (children file). This is how I started with Stata:

```
keep if midx==1&b9==0&hw1<24
tab hw1
recode hw1(0/1=1 "0-1")(2/3=2 "2-3")(4/5=3 "4-5")(6/8=4 "6-8")(9/11=5 "9-11")(12/17=6
"12-17")(18/23=7 "18-23")(24/59=.), gen(child_age)
tab child_age
tab child_age[w=v005]
```

But the result of the above did not correspond with the report figures. Any help on that and how to proceed to replicate Table 11.3: Breastfeeding status by age.

Thanks
