Subject: Re: Adolescent
Posted by Eminent Ben on Mon, 07 Mar 2016 22:35:02 GMT

Am using Nigeria 2013 DHS
I want to know the age grouping for adolescent mothers.
How to calculate the age specific fertility rate for adolescent mothers and to construct a binary variable to show if 1 a mother is adolescent or 2 if otherwise.
Am familiar with DHS data
Thanks for your technical assistance
